

Listing of Claims:

1. (Currently Amended) A carrying case comprising, in combination:

a case having a rectangular parallelepiped shape, with a top side, a bottom side, first and second spaced end sides, and first and second spaced lateral sides;

a flexible fabric sleeve in the form of a pocket comprising both said first lateral side and said bottom side;

an L shaped, generally rigid board member fitted and inserted into said fabric sleeve and comprising, at least, in part, said first lateral side and said bottom side as a generally rigid form, said board member having an inside and outside and including first and second passages therethrough;

fabric forming the remaining sides of said case;

a support foot fastened to the bottom side of the outside of said board member;

a telescoping handle extending vertically from the bottom side and fastened to the inside of the board member; ~~and~~

an L shaped forming bracket on the outside of the board member affixed to the board member on the first lateral side and to the bottom side to maintain the L shape of said board member inserted in the sleeve in combination with said handle; and

separate first and second spaced wheel housings mounted to the board member at the juncture of the lateral side and bottom side and in said first and second passages, respectively, to maintain said L shape of said board member.

2. (Cancelled)

3. (Original) The case of Claim 1 wherein the second lateral side comprises a panel flexibly attached to the bottom side and detachable from the end sides and top side for access to the interior of the case.

Serial No. 10/784,349

Attorney Docket No. 004286.00140

4. (Currently Amended) The case of Claim 2 1 wherein the board member includes precut slots to receive wheel housings, said slots located adjacent the juncture of the first lateral side and the bottom side.
5. (Cancelled)
6. (Cancelled)
7. (Currently Amended) The case of Claim 2 1 wherein the interior of the case is divided into multiple compartments; with a center compartment open at the top side for receipt and storage of a personal computer.
8. (New) The case of Claim 1 wherein said telescoping handle includes a lower end bracket on the inside of the board member for maintaining the L shape of the board member.
